**Disaster
Recovery**
SOLUTION

www.apptius.com

The key to the successful recovery of your business will be determined by how prepared you are today.

What would happen if one day all your business data was gone? Unforeseeable events such as fires, hardware failures or theft happen every day to businesses. The key to a successful recovery will be determined by how prepared you are today.

Apptius makes backing up your valuable business data easy. Different from a standard file back up, the Disaster Recovery Solution backs up a **mirror image of your entire computer/server, including the operating system and software**. Standard file back ups can take days to rebuild and could be incomplete, but with an image backup the recovery takes only hours and is 100% complete.

	Itinerary of a person recovering from a hard drive failure if the backup solution is a standard backup:	Itinerary of a person recovering from a hard drive failure using Apptius's Disaster Recovery Solution :
Day 1		
8:00	Replace hard drive	Replace hard drive
9:00	Find and reinstall Operating System	Reinstall from image backup
10:00		
11:00	Configure Operating System	Start working
12:00		
1:00 - 5:00...	Find (if possible) and reinstall software	
Day 2		Disaster recovery in hours, not days. Having the proper preventative measures in place is the key to a quick recovery with little operational disturbance.
8:00 - 5:00	Continue installing software	
Day 3		
8:00 - 5:00	Restore data from backup	
Day 4		
8:00 am - 4:00 pm	Migrate user data	
5:00	Start working
