

Canada Post Approved

Vantage Shipping is an eLink solution approved by Canada Post. Integration with Dynamics GP results in:

- **Compatibility.** Allows you to generate Canada Post approved:
 - Labels
 - Commercial Invoices
 - Printed and Electronic Manifests
- **Faster shipping.** The automation accesses Canada Post's services faster.
- **Greater accuracy.** Scales and printers recommended by Canada Post will ensure compatibility and accurate results.
- **Accurate shipping cost estimates.** Real-time retrieval of shipping cost estimates from Sell Online.
- **Faster information retrieval.** Instant availability of tracking numbers to your Customer Service Representatives.
- **Shipping discounts.** 3% automation discount from Canada Post.
- **Real time updates.** Track packages with greater ease and detail.

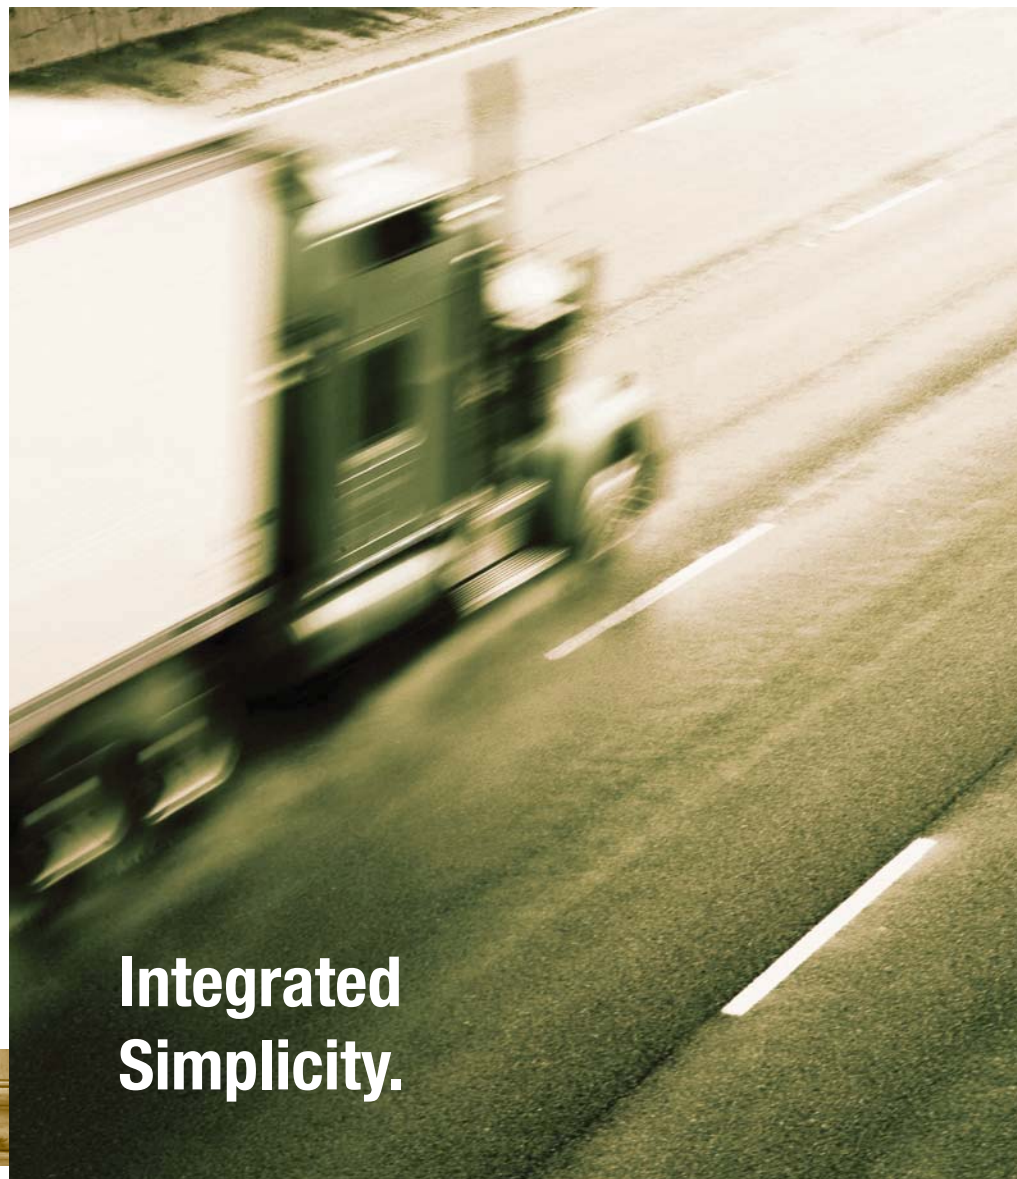

Product Support

Apptius provides full services for implementation and after sales support.

Shape up your shipping department!

Call Apptius today and tell them you want to save 3% on shipping costs and streamline your shipping department.

Integrated Simplicity.

Vantage Shipping for Microsoft Dynamics GP®

Adding Vantage Shipping to your high volume shipping work flow will save you time and money.

Vantage Shipping for Microsoft Dynamics GP allows your shipping workflow to conform to the specifications published by Canada Post allowing for efficient mail handling, traceability and accurate billing.

Easy to use

Data is entered into Microsoft Dynamics GP via the standard Sales

Order Process or Invoicing Modules. Vantage Shipping retrieves the shipping

information entered into Dynamics GP and communicates with Canada Post to initiate the delivery process automatically.

Canada Post Approved

Vantage Shipping prints Canada Post approved shipping labels and automatically submits electronic shipping manifests that conforms to Canada Post specifications.

Save Money

Process shipments more efficiently by eliminating duplicate data entry into multiple systems while reducing shipping errors.

Do More in Less Time

Increase the efficiency of your shipping workflow. Automating the shipping process eliminates repetitive data entry, additional processing and handling.

Integrating a scale and bar code scanning into your shipping work flow allows you to capture more data faster and more accurately.

The original order can be updated with tracking information and additional shipping details can be added to the Vantage Shipping Software.

Ship More for Less

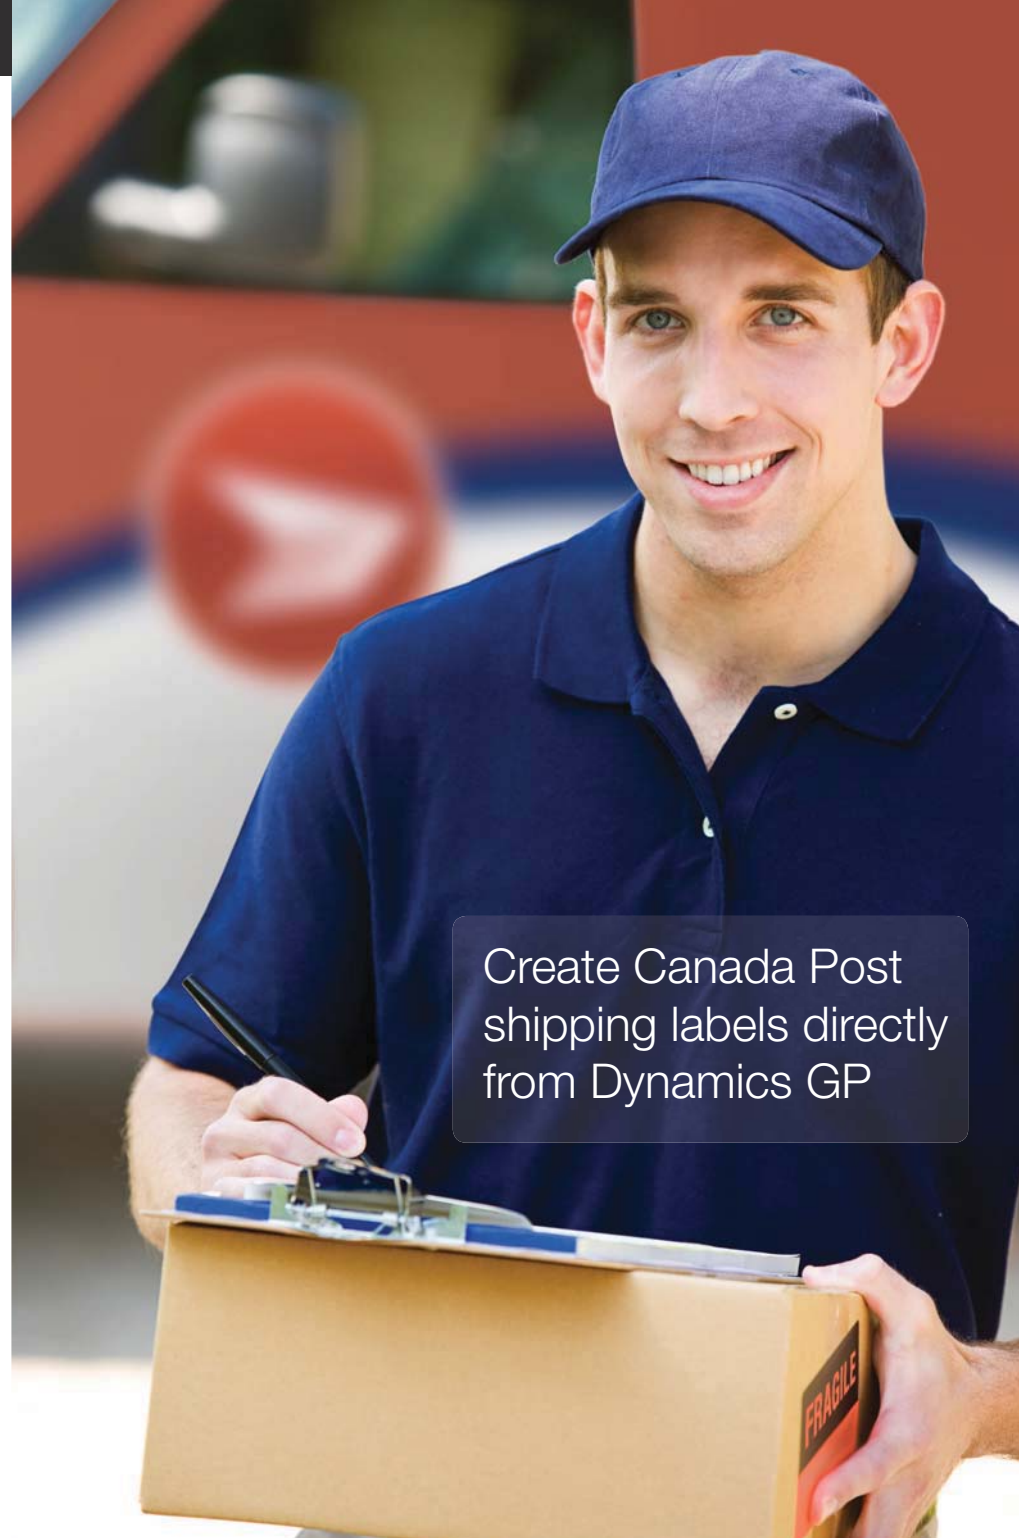

Canada Post offers a 3% discount to their customers that automate their shipping workflow.

Some Microsoft Dynamics GP users find that the shipping discount alone is enough to offset the investment.

A Better Customer Experience

Respond quickly to customer order status inquires. Customer Service Representatives are able to retrieve shipping order details including tracking numbers and shipment dates from one place — Dynamics GP.

Create Canada Post shipping labels directly from Dynamics GP
